PARKINGPRO®

BARRIER INTEGRATIONS

Keep your barriers. Connect them to every booking.

ParkingPro connects your existing barrier and ANPR systems to your reservations — ticketless access from booking to barrier, for your own bookings and every partner channel.

0
paper tickets — the plate or QR is the ticket

1
dashboard: bookings, occupancy, pricing, access

Live
occupancy per location and zone

500+
locations on ParkingPro

BUILT FOR

- Airport parking
- Airport hotels
- Valet & shuttle
- Real estate & offices

One gate, every channel.
Your own bookings, resellers and booking platforms open the same barrier — by plate, QR code or NFC.

FROM BOOKING TO BARRIER

Every booking knows the way in.

Your barrier controller and ANPR cameras talk to ParkingPro. When a car arrives, the platform checks the booking in real time and tells the barrier to open — or not.

Booked
On your site, a reseller, a platform or an AI assistant.

›

Access sent
Plate registered; QR code sent to the customer.

›

Recognised
ANPR reads the plate or the QR code is scanned.

›

Barrier opens
Only for a valid booking, in the right time window.

›

Logged
Entry and exit on the booking, occupancy updated live.

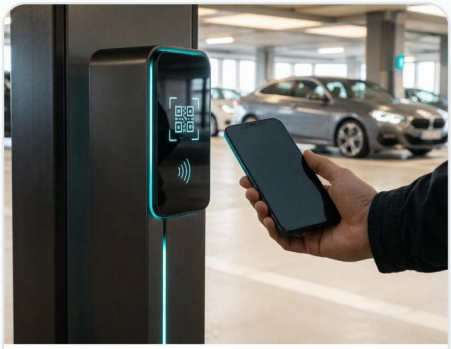

Access methods

Combine them per location, zone or customer type

Licence plate

The plate is the ticket. The camera matches it to the booking — no queue, no paper.

QR code

Sent to the customer with the confirmation — also for bookings from partner channels.

NFC

Tags and phones for staff, subscribers and key lockers.

WHAT IT BRINGS

Smoother entry. Less work at the gate.

- ✓ No tickets, no queues at the entrance
- ✓ Fewer staff needed at the barrier
- ✓ Live occupancy, overstay visible at a glance
- ✓ Partner bookings open the barrier via QR
- ✓ Every entry and exit on the booking
- ✓ GDPR-compliant, configurable data retention

Partner bookings at the barrier: QR access included.

Bookings from resellers and booking platforms get a QR code sent to the customer — so they open your barrier just like your own bookings. At hotels and car parks alike.

FREEDOM OF INTEGRATION

Keep your hardware. Upgrade with our software.

Where other systems restrict integrations or charge extra for access, ParkingPro works with the equipment you already have — no closed proprietary systems.

Our own hardware and access control partners

Barriers · access control · key lockers · robotics

PARKINGPRO · AMANO · SKIDATA · HIKVISION · HÖRMANN · VTI

STD SECURITY TECHNICS & DEVELOP · pbt beveiliging en telecom · MARSHALL SECURITY SERVICES · TOO GETHR · MB SAFETY EST 1989 FAMILY OWNED · YASKAWA MOTOMAN ROBOTICS

KEEP THE HARDWARE, UPGRADE THE SOFTWARE

ParkingPro Multichannel Manager

We connect your barriers. Everything else is already connected.

PARKINGPRO®

INTEGRATION PROJECT

HOW AN INTEGRATION WORKS

Assessed per site. No guesswork.

Barrier controllers and ANPR systems differ in protocols, data formats and interfaces. That's why we review every site's equipment before confirming what can be connected — and what it takes.

01

Tell us your system

The brand of your current barrier system is all we need to start.

02

Compatibility review

Our technical team assesses what level of integration is feasible for your site.

03

Connect & test

Controller linked to your booking data and tested with real arrivals and departures.

04

Go live & support

Your team runs it from the Command Center; changes run through us.

WHAT TO SEND US

Just the brand of your current barrier system.

Amano, SKIDATA, Hikvision or another make — our technical team takes it from there.

CONSULTANCY

Hire us as advisor or to guide your project.

Not sure which hardware fits, or need someone to steer the integration? Our team joins as consultant or project lead.

- Independent advice on barriers, ANPR and access
- Project lead between you and your hardware supplier
- Requirements, planning and go-live coordination
- From a single car park to a multi-airport network

Frequently asked questions

Will my barriers work with ParkingPro?

That depends on make, model and controller. We assess every site individually before confirming what can be connected.

Do I need to replace my hardware?

Not necessarily. ParkingPro integrates with your existing setup wherever possible; upgrading is an option, not a must.

Can partner bookings open my barrier?

Yes. Bookings from resellers and booking platforms get a QR code sent to the customer, and the plate is linked to the booking.

START YOUR REVIEW

Connect your barriers to every booking.

Send us the brand of your barrier system — we'll tell you what's possible for your site.
