PARKINGPRO®

AIRPORT HOTEL PARKING

Parking software for airport hotels

Your hotel car park can generate more revenue. ParkingPro makes spare spaces bookable and connects reservations, rates, shuttle scheduling and access control — while keeping room for your own guests.

More info: parkingpro.eu/en/solutions/airport-hotel-parking

FOR HOTEL MANAGERS

Guests first. Sell the rest.

Monetise remaining capacity

Protect the spaces for your hotel guests first. Only the remaining capacity is sold to air travellers.

Occupancy per channel

See in real time how many spaces are occupied via your own website, the front desk and every connected booking channel.

Revenue management

Rates per period, parking duration and channel. Adjust for peak times and seasons and compare revenue per parking space.

Capacity management

Set limits per channel and automatically close external sales when your own guests need the space.

Command Center

Occupancy, revenue, rates, resellers and API/MCP in one overview, on top of your existing barriers and cameras.

Next-gen Barriers

Number plate recognition and barriers linked to the reservation. A valid booking opens the barrier, without front-desk involvement.

Full access, your own data

Freedom to integrate. Full control. Your data and partners remain yours, via open API and MCP.

Ready for AI bookings

Prepared for agentic booking: AI assistants can query real-time availability and book, right through to access at the barrier.

Explore the potential of your hotel car park

PARKINGPRO®

AIRPORT HOTEL PARKING

All new bookings, centrally in one system

- Choose which spaces to offer to air travellers
- Multichannel Manager: your own booking form and resellers share one inventory
- Real-time flight data in the daily schedule and shuttle planning
- Number plate recognition, QR access and payments linked to the reservation
- Floorplanner Pro layout map of your car park
- Full access API and MCP — your data, rates and partners stay yours

EXISTING BARRIERS

Connect ParkingPro to your existing barrier system

You do not need to replace anything. ParkingPro connects with your current barriers, number plate cameras and access equipment as soon as we have access to your system's API. A valid reservation opens the barrier, while your data, rates and partners remain fully yours.

- ✓ API connections without hassle: we tailor the integration to your system's capabilities.
- ✓ Freedom to integrate, full control: no limitations on what you connect or sell.
- ✓ Full access via open API and MCP: connect your own systems, tools and partners freely.
- ✓ Next-gen Barriers is an option, not a requirement: your current hardware keeps running.

Hardware & access control partners

10+ partners

AMANO · PARKINGWARE · HIKVISION · SKIDATA · HÖRMANN · VTI · STD · pbt · MB SAFETY · EST 1989 FAMILY OWNED · MARSHALL SECURITY SERVICES · YASKAWA MOTOMAN ROBOTICS · TOO GETHR

MULTICHANNEL MANAGER

One inventory for every sales channel

Prices & availability in sync

Your own booking form, the front desk and every connected reseller share one live inventory. Change a rate or close a channel once — it updates everywhere instantly.
