PARKINGPRO®

BARRIERS & HARDWARE

Barriers & smart access control

Software and technology from one supplier. We supply, install and maintain the equipment on your site — directly connected to the platform, with no disconnected systems.

More info: parkingpro.eu

WHY PARKINGPRO

Strong on their own. Smarter together.

Access by number plate

A registered plate becomes the key. No cards, tickets or remotes.

Instant flow

The barrier opens right after recognition. No waiting, no queues.

Reliable day and night

High recognition rate in rain, fog, low sun and after dark.

Better management

Plate lists, rights, groups and rates in one portal. Changes apply instantly.

Works with existing barriers

Connected via API, or made smart with the PP Smart Box. No replacement needed.

No limitations

Open API and MCP: connect your own systems, tools and partners freely.

Privacy-compliant

GDPR-proof, with configurable retention and automatic deletion.

Advice to maintenance

We advise, supply, install and maintain. One point of contact.

10+ years in airport parking

PARKINGPRO®

BARRIERS & HARDWARE

One plate. One welcome. No detours.

- Recognise: the camera reads the plate
- Verify: access rights decide who may enter
- Open: the barrier clears the way
- Record: every movement is logged
- GDPR-compliant, with configurable retention

Our hardware — supplied, installed and maintained by ParkingPro

Barrier systems
Reliable barriers, fully linked to your reservations.

ANPR cameras
Access without tickets or queues, day and night.

QR code & NFC
Contactless access via smartphone.

Label printers
Stickers, key labels, receipts and tickets.

Key safes
Secure, logged key management for valet.

Robotics
Robotic key storage and handover.

SOFTWARE MAKES THE DIFFERENCE

Connect ParkingPro to your existing barrier system

Hardware is available everywhere — the software behind it makes the difference. ParkingPro connects with your current barriers, number plate cameras and access equipment as soon as we have access to your system's API. A valid reservation opens the barrier, while your data, rates and partners remain fully yours.

- ✓ API connections without hassle: we tailor the integration to your system's capabilities.
- ✓ Freedom to integrate, full control: no limitations on what you connect or sell.
- ✓ Better management: plate lists, rights, groups and rates in one portal.
- ✓ Full access via open API and MCP: connect your own systems, tools and partners freely.
- ✓ Next-gen Barriers is an option, not a requirement: your current hardware keeps running.
- ✓ Paid and free parking recorded side by side, per group and location.
